CATALYTIC FINANCE PARTNER: CONSERVATION INTERNATIONAL VENTURES

CI Ventures

Conservation International Ventures ('CI Ventures') is an impact-first investment vehicle which provides financing solutions to SMEs that operate in the forests, oceans and grasslands where Conservation International works.

In the face of food insecurity, climate change and overwhelming landscape degradation, CI Ventures knows that investing in sustainable, impactful enterprises is the most enduring way to tackle the major environmental threats facing Africa's people.

CI Ventures addresses the twin environmental threats of climate change (caused by GHG emissions) and the loss of natural capital (as a result of human activity) through investing in sectors that generate substantial, positive environmental outcomes.

CI Ventures' Investment Mandate:

Deal size: R3 million to R8.5 million

Typical duration: 18-36 months

Products:

- Concessional direct loans
- Quasi-equity
- Revenue-based financing

Priority sectors:

- Sustainable Food Production Systems
- Restoration of Degraded Land
- Forestry Products and Alternatives

Application Details:

To request an application form, please send a brief description of your enterprise (less than 200 words) along with the request to civentures@conservation.org.

Application Processing and Timelines:

CI Ventures will not respond to applications which do not include all requested information or where the business model falls outside CI Ventures' priority sectors and/or preferred investment terms.
