

## GreenCape Job Opportunity

### Senior Analyst: Sustainable Mobility and Energy Storage

#### About GreenCape

GreenCape is a non-profit organisation that supports the development of the green economy – low carbon, resource-efficient and socially inclusive. We assist green technology businesses and investors focusing on green technologies and services to remove barriers to investment and growth.

#### Our Ambition

GreenCape's five-year strategy aims to be globally relevant in driving the uptake of green economy infrastructure solutions in the developing world context. As such, GreenCape is expecting to double in size in the next five years. For more details on GreenCape, visit [www.greencape.co.za](http://www.greencape.co.za)

#### The GreenCape Energy Programme

The GreenCape Energy Program is active throughout South Africa, focusing on both supply and demand aspects of the South African Energy Market. The program aims to increase job creation and investment into green technology and services that support the energy sector.

GreenCape would like to appoint a sustainable transport expert to the team. As part of our wider mandate to support the growth of the green economy, we are now doing work looking at the sustainable transport sector. We aim to find alternative and sustainable energy solutions to conventional transport fuel, resulting in efficient and low carbon transport systems. A large portion of our efforts has focused on the emerging electric vehicles (EV) and energy storage market. We see this market as a major contributor to a sustainable transport sector and, therefore, economic growth. Our objective is to see investments and industry activity leveraged in the Western Cape and the rest of South Africa through this market. Our efforts are, however, not limited to EVs. We have expanded our scope to look at opportunities in fuel cells, compressed natural gas (CNG) and biogas. All the knowledge and insight in this space is developed through continuous engagement with key stakeholders in government, industry and academia.

The successful candidate must have a passion for the South African sustainable mobility market and travel around South Africa.
